Summary

Full-stack developer with 8+ years of experience building scalable web apps, developer tools, and decentralized platforms. Led full frontend and backend development at Totem Live Accounting, designing robust off-chain architecture and modular systems. Adaptable engineer who rapidly learns new ecosystems, from Python and Golang to AngularJS and Polkadot, and delivers production-ready features fast.

Technical Skills

Languages: JavaScript, TypeScript, Python, Go, C#, PHP

Frontend: React, Tanstack Table, React Hook Form, AngularJS, Redux, Semantic UI, React, Material UI, Tailwind, HTML, CSS, Bootstrap

Backend: Node.js, FastAPI, Express.js, Golang, Redis, Postgres, CouchDB, TweetNaCl.js **Blockchain:** Polkadot/Substrate, Web3.js, Polkadot.js, NFT, BONSAI verification, DApps

Tools: Vite, Docker, Firebase, WebSockets, RxJS, Git, GulpJS, RabbitMQ

Other: REST APIs, Webhooks, Microservices, MVP prototyping, Agile

Experience

Nextion (Remote, US) - Full Stack Developer

Feb 2025 - Present

Tech: React, TypeScript, Zod, Vite, Tanstack Table, React Hook Form, Python, FastAPI, Postgres, Redis

- Developed a trade approval, execution and monitoring UI integrated with Redis-based quant order system and executed using Interactive Brokers (IB) gateway
- Fast-tracked learning Python using AI to ship FastAPI-based backend with Dockerized Postgres - Engineered automated audit log system in Postgres, displayed via UI
- Supported performance analysis by exposing real-time backend services metrics and trade execution states

[Totem Live Accounting](#) (Remote, CH) - Co-founder & Lead Developer

Mar 2019 - Mar 2024

Tech: JavaScript, React, Node.js, CouchDB, Polkadot.js, WebSockets, Semantic UI, React, Material UI, TweetNaCl.js

Core Contributions:

- Sole developer for entire frontend & off-chain backend system
- Produced full SPA with modules like:
 - In-app wallet, partner management, timekeeping, and rewards
 - Marketplace with proposal submission & approval and automated payouts on completion
 - Integrated chat, Discord support, onboarding flow, and financial statement viewer
 - Streamlined user onboarding flow with signup, faucet, backup and diff-aware seeding
 - Financial statement viewer using Totem's enterprise-grade accounting engine
- Engineered a sequential & resumable on/off-chain transaction queue with UI-based handling
- Co-designed and implemented [Blockchainization of NoSQL Storage Authorization](#)
- Launched the Crowdloan & Pledge DApp, enabling users to participate in the Kapex (KAP) ecosystem
- Secure communication between microservices using [TweetNaCl.js](https://tweetnacl.js.org/)
- Authored cross-stack library `common-utils` with Reactive hooks, components, JSON serializers, and more
- Automated CI with GitLab webhooks and custom scripts for source-committed builds and deployments
- Boosted user retention, social engagement & bug discovery through gamified rewards
- Coded and deployed [Totem Live Accounting](https://totemaccounting.com/) homepage

Community Contributions:

- Launched and ran the Totem Ambassador Program
- Led multilingual Telegram and Twitter engagement, doubling community engagement and growth
- Provided user support by in-app live chat, socials and led feature walk-throughs

Omniscape (Remote, US) - Tokenization Developer

May 2021 - Jan 2022

- Built the tokenization engine for virtual real estate assets
- Integrated Stripe and Web3 payment flows
- Worked on the Virtual Real Estate Map application, a SPA frontend in React + Redux
- Created NodeJS microservice for automation of tokenization transactions using queues
- Discovered and fixed major security flaws left by ex-dev
- Engineered a NodeJS microservice for queueing & automation of Web3 payment transactions

Freelance & Open Source Developer

2017 - Present

- [Halo Info Bot](https://github.com/alien45/halo-info-bot) (AKA Halo Butler), a Discord bot
- [HaloDEX data feed server](https://github.com/alien45/halodex-chart-feed), a Tradier API wrapper
- [Cloud Connector](https://github.com/alien45/cloud-connector) for connecting to Microsoft Azure

The Summit Group (Melbourne, AU) - Full Stack Developer

Apr 2016 - Apr 2017

- WHMCS payment integration via Ezidebit API
- SPA admin dashboard for customer billing and invoicing system using AngularJS, dep
- Backend API & microservices using Go, MySQL & RabbitMQ
- Programmed automation tools in Go for parsing, formatting and storing telecom prov

Web123 Pty Ltd (Melbourne, AU) - Full Stack Developer

Jul 2015 - Mar 2016

- Worked with the tech lead on <a title="A WYSIWYG CMS designed to make delivering v
- Turned designs into working responsive websites

Easyweb Digital (Melbourne, AU) - Systems Developer

Sep - Dec 2014

- Backbone.js component development
- UI/UX components using Bootstrap and Underscore

Education

BEng Software Engineering (First Class Hons)

University of Greenwich, London, UK (2011-2014)

Certifications

- ****Red Hat Certified Engineer (RHCE)**** - 91.2% test score
- ****Apps for Good**** – Entrepreneurship, Facebook Apps development, MVP project & pre
