Summary

Full-stack developer with 8+ years of experience building scalable web apps, developer tools, and decentralized platforms. Led full frontend and backend development at Totem Live Accounting, designing robust off-chain architecture and modular systems. Adaptable engineer who rapidly learns new ecosystems, from Python and Golang to AngularJS and Polkadot, and delivers production-ready features fast.

Education

BEng Software Engineering (First Class with Honours)

[University of Greenwich](#), London, UK (2011–2014)

Final Year Project (Indoor Positioning via WiFi Fingerprinting): Designed and built a proof-of-concept Android app for WiFi fingerprinting and real-time indoor location tracking using signal strength, triangulation, and basic ML via SDKs.

- Launched the Crowdloan & Pledge DApp, raising \$1+M in the Polkadot Parachain auction and \$83.6K in the pledge round
- Secured & encrypted inter-microservice communication with [TweetNaCl.js](#)
- Authored cross-stack library `common-utils` with Reactive hooks, components, JSON storage & CouchDB helper and form + API data validation library
- Automated CI with GitLab webhooks and custom scripts for source-committed builds and improved release traceability
- Coded and deployed [Totem Live Accounting](#) homepage from design specs
- Architected semi-automated tooling for multilingual support for API & frontend

Community Contributions:

- Boosted user retention, social engagement & bug discovery through gamified rewards engine and responsive onboarding
- Launched and ran the Totem Ambassador Program
- Led multilingual Telegram and Twitter engagement, doubling community engagement and improving support responsiveness across 6+ language groups
- Provided user support by in-app live chat, socials and led feature walk-throughs

Demo Of My Work: [Totem.Live DApp](#) | [Crowdloan DApp](#) | [Polkadot Decoded](#)

Podcasts: [Totem Tech Talks](#) | [RelayChain](#) | [Parity & Friends](#)

Open Source: [Totem UI](#), [Message Service](#), [Common Utils](#) and [others](#)

[Omniscope, US](#) - Tokenization Developer (Remote)

May 2021 - Jan 2022

- Built the tokenization engine for virtual real estate assets

- Integrated Stripe and Web3 payment flows
- Worked on the Virtual Real Estate Map application, a SPA frontend in React + Redux and NodeJS backend, deployed on Firebase
- Created NodeJS microservice for automation of tokenization transactions using queuing mechanism and singleton pattern
- Discovered and fixed major security flaws left by ex-dev
- Engineered a NodeJS microservice for queueing & automation of Web3 payment transactions and randomization of rewards for campaign events

Open Source Work & Other Activities

2017 - 2019

- [Halo Info Bot](#): Discord chatbot in Go for the Halo Platform blockchain and masternode/DEX data
- [HaloDEX Chart Feed](#): Real-time TradingView charting data server in Go
- [Cloud Connector](#): Tool for syncing data across AWS S3, GCP, and Azure
- Wrote a [PhD research proposal \(PDF\)](#) on security vulnerability detection in blockchain-based systems (unfunded)
- Ran a small GPU-based home crypto mining operation during the early Ethereum days

The Summit Group, Melbourne, AU - Full Stack Developer

Apr 2016 - Apr 2017

- WHMCS payment integration via Ezidebit API
- SPA admin dashboard for customer billing and invoicing system using AngularJS, deployed with Docker
- Backend API & microservices using Go, MySQL & RabbitMQ
- Programmed automation tools in Go for parsing, formatting and storing telecom provider billing data
- Co-interviewed, helped onboard and mentored an intern

Web123 Pty Ltd, Melbourne, AU - Full Stack Developer

Jul 2015 - Mar 2016

- Worked with the tech lead on **Foxley CMS**, building backend APIs, unit tests (C#/.NET), and UI in AngularJS
- Turned designs into working responsive websites

Certifications

- [Apps for Good](#) (2012) - MVP development, team leadership, and final presentation at Facebook London HQ. Sponsored by Facebook & others.
- **Red Hat Certified Engineer - RHCE** (2009) - 91.2% test score

Technical Skills

Languages: JavaScript, TypeScript, Python, Go, C#, PHP

Frontend: React, Tanstack Table, React Hook Form, AngularJS, Redux, Semantic UI
React, Material UI, Tailwind, HTML, CSS, Bootstrap

Backend: Node.js, FastAPI, Express.js, Golang, Redis, Postgres, CouchDB,
TweetNaCl.js

Blockchain: Polkadot/Substrate, Web3.js, Polkadot.js, NFT, DApps

Tools: Vite, Docker, Firebase, WebSockets, RxJS, Git, GulpJS, RabbitMQ

Other: REST APIs, Webhooks, Microservices, MVP prototyping, Agile

Additional Info

Languages: English (Fluent) | Bangla (Native)
